DynFi™ launches an OpenSource firewall

French company DynFi® launches DynFi® Firewall, a unique firewall that enables enterprises and institutions to effectively protect their networks while providing full visibility into its source code.

[Access to the firewall's source code](#) ensures that there are no backdoors or malware on these firewalls. This transparency strategy promotes widespread adoption of the firewall by users who can [download and install it for free](#).

« We are very proud of the development of this new firewall which offers a real alternative to the leading Open Source firewall pfSense®. DynFi Firewall is forked from OPNsense® and uses FreeBSD 13 and a modern compilation architecture. » said Gregory Bernard, CEO of DynFi®.

DynFi® Firewall offers numerous network filtering, intrusion detection, VPN and Proxy features. It is compatible with [the DynFi® Manager](#), a unique central solution for Open Source firewall management, simplifying the life of system administrators.

The DynFi® Company offers [a catalog of appliances with DynFi® Firewall pre-installed](#). This accelerates the deployment of unified cybersecurity policy in the enterprise and meets the needs of SMBs, ETIs.

DynFi® Firewall has been developed by DynFi® for three years with the support of [RECIA \(Région Centre Interactive\)](#) and [Systematic Paris Région](#).

**About DynFi®:**

Founded in 2001, DynFi® is a French company specializing in the development of cybersecurity systems, and is an expert in open source firewall and virtualization technologies. With more than 7000 firewalls marketed to 750 customers mainly in Europe and the USA, DynFi® is the leader in open source cybersecurity in France. Since 2008 DynFi has built a service offering around open source software related to cybersecurity and networks. In 2018 DynFi® has launched the first centralized manager for Open Source firewalls: DynFi Manager. Labeled by the Systematic R & D cluster in May 2020, DynFi obtains the "Cybersecurity Made in Europe" label in 2021. DynFi® defends a free and autonomous vision of network cybersecurity.
